

MSM utility path: NON-GCode editor

- The first dialog is for the dialog for the NON-GCode editor. The “NON” means the editor used for all things EXCEPT GCode. Example: this is used to who reports etc by MSM.
- Tyou said this one is set to notepad.exe which is good.

MSM utility path: GCode editor

- The second dialog is for the GCode Editor. This is not the same as the NON-GCode editor. This is what is used to edit gcode – i.e. when you click the EDIT button on the load page.
- This is the one you have set to a DLL – which WILL NOT work. Change it to point to notepad.exe. Make it the same as the non-gcode editor is you want to use the same editor for both GCode and non-GCode files.

MSM utility path: PDF reader

- The third dialog is for the PDF reader. This is an example for the PDF reader I use:
